

Services – Fascia/Soffit/Gutter Clean Overview

The Window Wash Company clean fascia/soffit/gutter/cladding surfaces using the following processes:

1. An organic, citrus-based cleaner/degreaser is first sprayed or brushed onto the surfaces to loosen the grime.
2. Surfaces are then either scrubbed clean using a water-fed pole and brush or jetted using a controlled high-pressure washer and high-reach telescopic lance.
3. Cleaned surfaces are then wiped clean of drops using cloth or T-Bar applicator.
4. If applicable, windows are then cleaned (optional extra).

Requirements:

- External tap/water supply for degreaser backpack and pressure washer.

(Weather: FSG cleans can be carried out in wet weather conditions).
